- 2.2 The net is tensioned at both ends so that its top part extends 110 cm over the playing court surface all the way across the playing court. The maximum permissible height deviation of the net is ± 2 cm. The distance between the lowermost edge of the net and the playing court surface is not more than 20 cm.

The height of rebound is measured on the Kistler plate by having the ball fall from a height of one (1) metre with the valve facing up.
- 3.2 A lighter ball of the weight 338–395 g must be used for Children’s category (age up to 12 years).

4. Start of play

Neither the ball nor the foot shall touch the playing court (including the lines) when a service is being executed. The ball shall be released from serviceman's hand(s) or lay on the ground for servicing.
- 5.3** The service shall be carried out within 5 seconds from the moment the referee gives the order to start the play.
- 5.4** The ball shall cross the net and land on the opponent's service zone or touch the opponent(s).
- 5.5** The service is valid even if the ball touches the net and then lands on the opponent's service zone or touches the opponent(s).

The maximum possible number of ball drops in competitions ruled by national futnet association is three (3) for any category and discipline. Between two ball drops (if allowed) there must be always one touch of the player.

If not, the set is finished, when one of the teams achieves the fifteenth (15th) point (then, the final score of the set is 15:14).
- 7.3** An alternative scoring method in the third set is the shortened set ("tie-break"). In that case the team (player) which first achieves the seventh (7th) point will win the set and the match – no two-point difference is necessary. The use of tie-breaks must be announced before the event. However tie-breaks must not be used in knock-out stage matches.
